

## ServerCall Paging System

System consists of one transmitter (paging panel) with the possibility to use for 24 server's pagers and 4 managers, on the panel there is an empty space to write the waiter's name. The other part is the server's pagers it is a belt clip rechargeable pager (alert type: vibration & flash or with beep sound option) and the manger's are the same.

### Operation:

Place the paging panel close to the chef or close to delivery window / counter, once the food is ready simply press on the name of the server whom place the order, immediately the server receives silent alert invisible to guest requesting him to proceed to kitchen to pickup the food.

The system can cover 2 km range area easy to use and to install. Pagers need 4 hours charging and can work up to 36 hours.

### Additional futures:

- 1) If the server failed to pick up the food from the kitchen within a certain pre set time the paging panel will send silent alert to restaurant manger informing him that there is a problem in the kitchen.
- 2) You can send 3 different alert types to your server to inform him different massages.
- 3) You can call all waiter in one touch
- 4) You can call all mangers in one touch
- 5) You can add one more panel if you need to use for mare than 24 pagers
- 6) If your servers are not allowed to enter the kitchen you can place one more cancellation panel right near the delivery window from out side so they can pick up the food and cancel their calls from the panel. Contact us for more information.
